1 SEC. 2. FINDINGS.

2 Congress finds the following:

3 (1) Thousands of rescue workers who responded
4 to the areas devastated by the terrorist attacks of
5 September 11, local residents, office and area work-
6 ers, and school children continue to suffer significant
7 medical problems as a result of compromised air
8 quality and the release of other toxins from the at-
9 tack sites.

10 (2) In a September 2006 peer-reviewed study
11 conducted by the World Trade Center Medical Moni-
12 toring Program, of 9,500 World Trade Center re-

1 sponders, almost 70 percent of World Trade Center
2 responders had a new or worsened respiratory symp-
3 tom that developed during or after their time work-
4 ing at the World Trade Center; among the respond-
5 ers who were asymptomatic before 9/11, 61 percent
6 developed respiratory symptoms while working at the
7 World Trade Center; close to 60 percent still had a
8 new or worsened respiratory symptom at the time of
9 their examination; one-third had abnormal pul-
10 monary function tests; and severe respiratory condi-
11 tions including pneumonia were significantly more
12 common in the 6 months after 9/11 than in the
13 prior 6 months.

14 (3) An April 2006 study documented that, on
15 average, a New York City firefighter who responded
16 to the World Trade Center has experienced a loss of
17 12 years of lung capacity.

18 (4) A peer-reviewed study of residents who lived
19 near the World Trade Center titled “ The World
20 Trade Center Residents’ Respiratory Health Study:
21 New Onset Respiratory Symptoms and Pulmonary
22 Function”, found that data demonstrated a three
23 fold increase in new-onset, persistent lower res-
24 piratory symptoms in residents near the former

1 World Trade Center as compared to a control popu-
2 lation.

3 (5) Previous research on the health impacts of
4 the devastation caused by the September 11 terrorist
5 attacks has shown relationships between the air
6 quality from Ground Zero and a host of health im-
7 pacts, including lower pregnancy rates, lower birth
8 weights in babies born 9 months after the disaster,
9 higher rates of respiratory and lung disorders, and
10 a variety of post-disaster mental health conditions
11 (including posttraumatic stress disorder) in workers
12 and residents near Ground Zero.

13 (6) Federal funding allocated for the moni-
14 toring of rescue workers' health is not sufficient to
15 ensure the long-term study of health impacts of Sep-
16 tember 11.

17 (7) The Federal funding allocated for medical
18 monitoring does not provide for the medical moni-
19 toring of New York City area residents, office and
20 area workers, schoolchildren, or Federal employees
21 who responded to the terrorist attacks of September
22 11, 2001.

23 (8) A significant portion of those who re-
24 sponded to the September 11 aftermath have no
25 health insurance, lost their health insurance as a re-

1 sult of the attacks, or have inadequate health insur-
2 ance for the medical conditions they developed as a
3 result of recovery work at the World Trade Center
4 site.

5 (9) The Federal program to provide medical
6 treatments to those who responded to the September
7 11 aftermath, and who continue to experience health
8 problems as a result, was finally established more
9 than five years after the attacks, but is not ade-
10 quately funded and is projected to exhaust all Fed-
11 eral funding before the end of fiscal year 2007.

12 (10) Rescue workers and volunteers seeking
13 workers compensation have reported that their appli-
14 cations have been denied, delayed for months, or re-
15 directed, instead of receiving assistance in a timely
16 and supportive manner.

17 (11) A February 2007 report released by the
18 City of New York revealed that 410,000 people were
19 “heavily exposed”, to the toxins of Ground Zero.
20 The report also found that an estimated 30,000 re-
21 sponders are sick yet 21,000 of them do not have
22 adequate health insurance.

23 (12) The September 11 Victim Compensation
24 Fund of 2001 was established to provide compensa-
25 tion to individuals who were physically injured or

1 killed as a result of the terrorist-related aircraft
2 crashes of September 11, 2001.

3 (13) The deadline for filing claims for com-
4 pensation under the Victim Compensation Fund was
5 December 22, 2003.

6 (14) Some individuals did not know they were
7 eligible to file claims for compensation for injuries or
8 did not know they had suffered physical harm as a
9 result of the terrorist-related aircraft crashes until
10 after the December 22, 2003, deadline.

11 (15) Further research is needed to evaluate
12 more comprehensively the extent of the health im-
13 pacts of September 11, including research for
14 emerging health problems such as cancer, which
15 have been predicted.

16 (16) Research is needed regarding possible
17 treatment for the illnesses and injuries of September
18 11.

19 (17) The Federal response to medical and fi-
20 nancial issues arising from the September 11 re-
21 sponse efforts needs a comprehensive, coordinated
22 long-term response in order to meet the needs of all
23 the individuals who were exposed to the toxins of
24 Ground Zero and are suffering health problems from
25 the disaster.

11 “(g) COMMUNITY OUTREACH.—The Secretary shall
12 institute a program that provides education and outreach
13 on the existence and availability of services provided for
