Help Those Who Are Sick from September 11th

Would you suspect that a chronic cough, difficulty sleeping, frequent heartburn, or cancer could be related to the September 11th terrorist attacks? Learn how to help your patients who may be coping with 9/11-related physical and mental health disorders.

The World Trade Center (WTC) Health Program is offering free CME/CE online trainings through Medscape. These self-paced modules will enable you to:

- Recognize the unique presentation of many 9/11-related health conditions
- Identify which populations are most at risk for 9/11-related conditions
- Describe the benefits available through the WTC Health Program

In addition to providing medical training, this series is also available and appropriate for anyone who would like to learn more about the relationship between 9/11 exposure and health.

Visit www.medscape.org/viewcollection/33376 to create a free account and access the trainings.

What is the WTC Health Program?

The WTC Health Program provides medical monitoring and treatment to 9/11 responders in New York, Shanksville, and the Pentagon as well as survivors in New York City. The Program provides care at seven Clinical Centers of Excellence in New York/New Jersey and through the Nationwide Provider Network, which serves members who live outside of the New York City metropolitan area.

Visit www.cdc.gov/wtc or call 1-888-982-4748 for more information about the Program.

WTC Health Programs Available through Medscape

NOW AVAILABLE

Expert Column: After the 9/11 Terrorist Attacks: The WTC Health Program and Disaster Response

The goal of this activity is to explain the environmental hazards associated with the 9/11 attacks and provide information about the WTC Health Program.

Clinical Practice Assessment: Health Risks Associated with 9/11 and the WTC Disaster: Lessons Learned

This activity is intended for clinicians who have or may encounter patients who were exposed to environmental hazards on 9/11.

COMING SOON

Roundtable Video Discussion: Airway, Digestive and Mental Health Comorbidities in WTC Responders and Survivors

The goal of this activity is to understand the medical and mental health comorbidities found in 9/11 responders and survivors.

Video Lecture: Advances in the Screening and Treatment of WTC Responders and Survivors

The goal of this activity is to explain what we have learned about disaster response and the medical and mental health effects of environmental exposures, particularly 9/11.
